Sewerage and Water Board Reschedules Test Closure Possibly Affecting CBD Area, Encourages Residents to Report Changes in Water Pressure

NEW ORLEANS – A test closure of a 43 inch water line within the Carrollton Water Treatment Plant originally scheduled for Sunday, November 19 has been rescheduled for Monday, November 27, 2017 between 3 am and 9 am. The controlled test closure MAY impact the CBD.

The purpose of the test closure is in preparation for a valve repair on a 43 inch water line. Test closures are important in assessing the potential impact on water pressure prior to scheduled maintenance or repairs which will be scheduled in the coming weeks. The test closures are controlled, with S&WB employees constantly monitoring water pressure and assessing any impact. However, during the test

closures, S&WB is also asking customers to report any changes in water pressure by calling 52-WATER.
