

TRANSMISSION MAIN PROJECTS

The Sewerage and Water Board of New Orleans (SWBNO) is replacing several 60- to 80-year-old drinking water transmission mains within our distribution system with newer, larger pipes. These efforts will help improve water pressure in many parts of Orleans Parish.

This transmission main program is FEMA-funded and managed by SWBNO in cooperation with the City of New Orleans as part of the Joint Infrastructure Recovery Roads (JIRR) Program. There are 11 total transmission main projects—five projects underway and six future projects scheduled. These projects aim to proactively replace water lines as part of SWBNO’s commitment to infrastructure resiliency and reliability, a key focus area of our Five-Year Strategic Plan.

In Progress	Future Projects
South Dupre Transmission Main Project Anticipated Completion: 2023	Sixth St. Transmission Main Project Anticipated Start: 2023
St. Bernard Ave. Transmission Main Project Anticipated Completion: 2023	Assorted Transmission and Donor Waterlines Anticipated Start: 2023
